

**Here for preventive screening.
And here to help you on the journey.**

Find out how we care.

We're committed to supporting women from breast cancer prevention to post-recovery. That's why we provide state-of-the-art technology like breast tomosynthesis—one of the best FDA-approved breast cancer screening tools available today. Offered in partnership with Gaston Radiology, this advanced form of mammography creates 3-D images of the breasts, enhancing early detection and diagnosis when breast cancer is most treatable.

SCREENING & DIAGNOSTICS

The highest quality preventive and diagnostic care close to home—that's what we strive to provide for women in our community. With seven convenient locations, our diagnostic facilities provide a broad range of services from digital mammography to 3-D ultrasounds.

To schedule your screening appointment, please call 704-671-5300.

BREAST CANCER SUPPORT

Our Breast Cancer Clinic is designed to provide holistic support to women diagnosed with breast cancer through a multidisciplinary team including dedicated oncology social workers, dietitians and nurse navigators, as well as highly-trained breast cancer surgeons, medical oncologists and radiation oncologists.

For more information about the CaroMont Breast Cancer Clinic, contact Ashley Cloninger, RN at 704-671-7783.
